

The TMT Offshore Well Head Alignment Frames (WHAF) Basket is a large size multipurpose basket that is used to lift and protect the WHAF tooling from vessel to vessel. The internal structure can securely hold two WHAFs and protect them during transit to and from the rig.

Features:

- Easily transportable
- Four point lifting arrangements
- Corrosion resistant material
- Custom Inner Frame
- Designed to DNV 2.7-3 Portable Offshore Unit
- Third party approved, Certificate of Conformity for Lifted Equipment
- Designed for onshore handling by forklift and road transport
